

# License activation

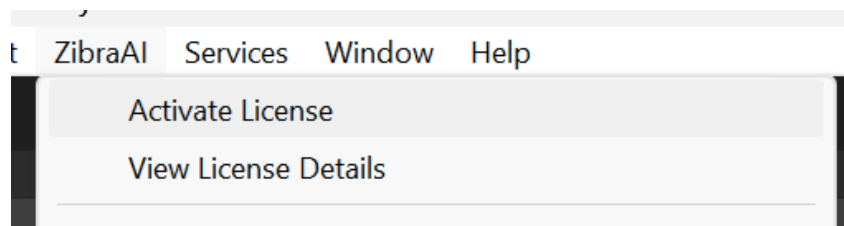

You must activate your Zibra Effects license before you can use the plugin in Editor.

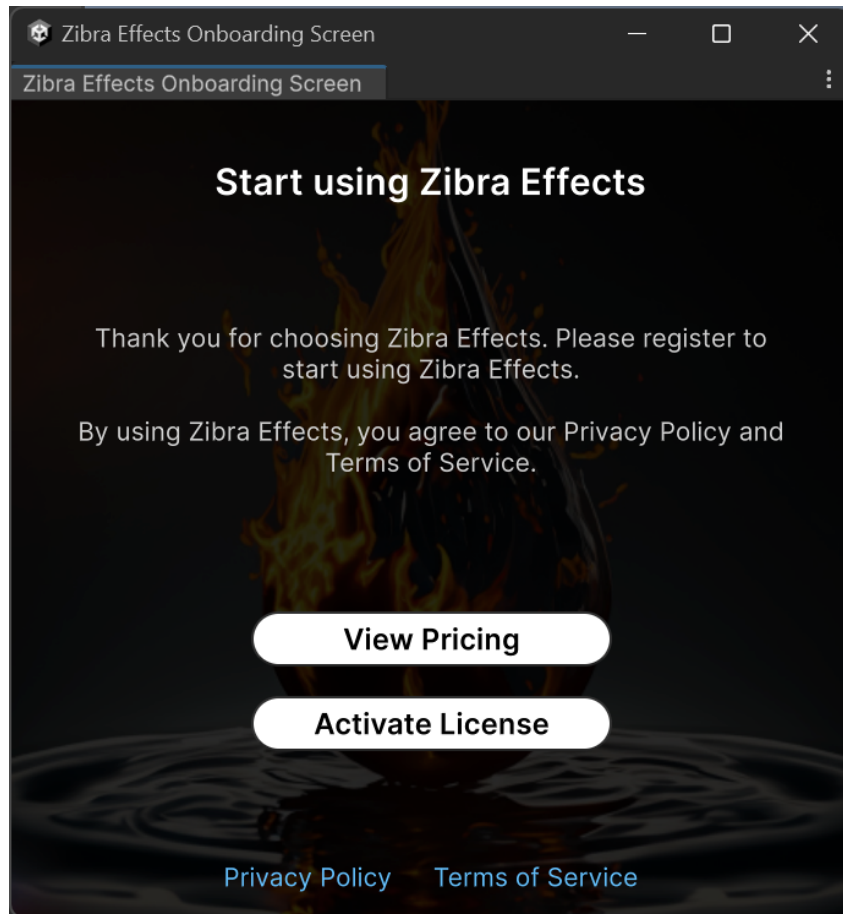

Each seat allows you to activate license on 2 different computers. If you reached your seats limit, please contact us at [support@zibra.ai](mailto:support@zibra.ai) to reset them.

To activate your copy of Zibra Effects:

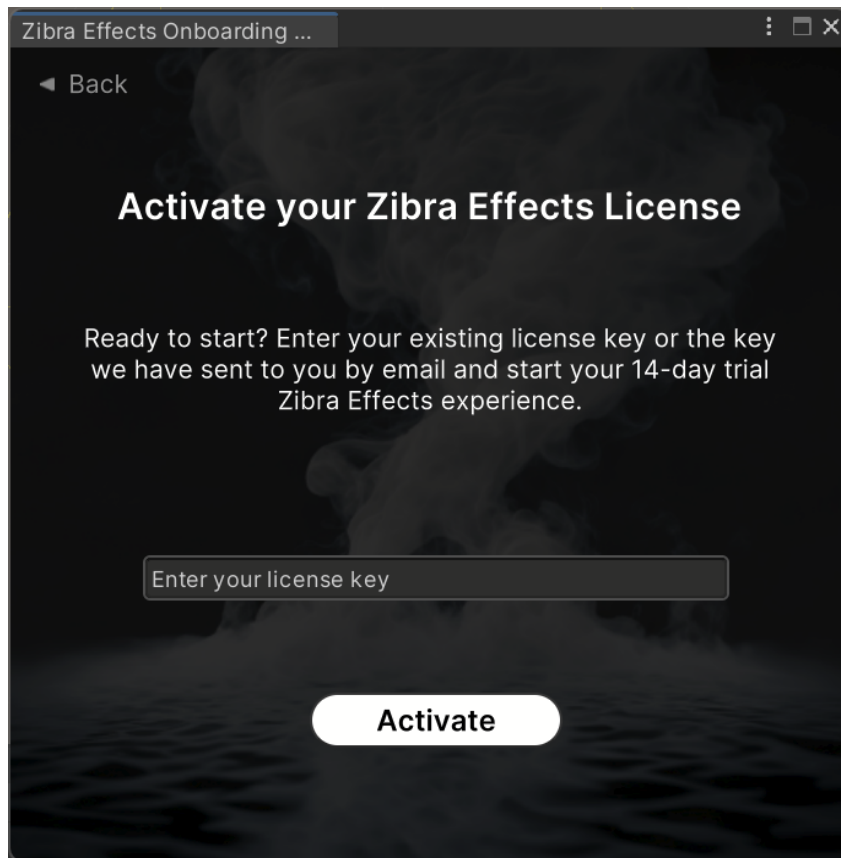

1. When starting Editor, the Onboarding window should open. If Onboarding window didn't open automatically, in the menu bar, select "ZibraAI → Activate License"

2. In the onboarding window select View Pricing, if you don't have license already, or Activate License otherwise

3. If you purchased a license, you should receive your license key on your email
4. Enter your license key

5. After successful validation you can start using Zebra Effects
